Innovate & Perform - Solutions for the Building Materials Market

1981 NCC incorporates and introduces flagship product, AcryShield® A500 acrylic coating for SPF roofing.

Reformulates AcryShield® A500 to resist the inherent problem of exudation found in acrylic roof coatings. **1983**

1985 Introduces new AcryShield® A400 for direct use over asphalt and gravel, and well suited for a wide variety of roofing substrates.

Develops new AcryShield® A600 with quick-set technology that resists early wash-off associated with heavy dew and light rain. **1989**

1990 NCC reformulates AcryShield® A400 to eliminate bleeding and staining of coating when applied over fresh asphalt roofing.

Introduces new AcryShield® A550, an acrylic coating with the tensile strength and elongation of a two-component solvent urethane coating. **1992**

1996 NCC becomes one of only three roof coatings manufacturers to qualify as a Duraplus® Roofing System Partner by the Rohm and Haas Company.

Introduces new AcryShield® MB that provides superior adhesion to mod bit and fresh asphalt, enhanced bleed-blocking, and advanced resistance to ponded water. **1999**

2000 Becomes only roofing products manufacturer to be named ENERGY STAR® Partner of the Year by the EPA for notable contributions to energy efficiency.

Introduces new RubberPrep® for EPDM roofing that promotes 2-to-4 fold increases in wet adhesion to coating. ENERGY STAR Partner of the Year again. **2001**

2004 Introduces new AcryShield® Roofing Systems for PVC Roofs that provides superior adhesion of coatings over PVC and stops the loss of plasticizers.

Introduces new breakthrough products, including:
1) High solar reflectance coating
2) Low permeance vapor barrier coating
3) Superior adhesion coating to recoat silicone **2005**
