# MCI WORLD COM

*Size: 38,000 Square Feet*

*Location: San Francisco, California*

## **Challenge** *Leaking BUR Capsheet Roof*

- Leak problems over critical facility.
- Multi-story building in congested urban area.
- Wall waterproofing & tie-in to roof problematic.

## **Solution** *AcryShield® SPF Roofing System*

- No disruptive tear-off required.
- Seamless system tying walls to roof field.
- Efficient equipment and hose staging.
- No more leaks.

*MCI WorldCom went with AcryShield SPF to avoid typical waterproofing deficiencies and short roof lives that they experienced with traditional built-up roofing.*
