

National Coatings New Center for Technical Innovation Facility to Transform Research in Next Generation Coatings

After months of hard work and preparation, National Coatings Corporation's (NCC) Center for Technical Innovation opens its doors.

Camarillo, CA June 23, 2009 -- National Coatings, www.nationalcoatings.com, new state-of-the-art laboratory has the capability to provide breakthrough research and development results for the coating industry in the years ahead. This new center equipped with cutting edge instrumentation will support National Coatings in the development of next generation coatings for numerous construction applications.

"We are very excited to finally have this research facility available to us so we can immediately start reaching new innovative goals and providing our lab technicians with the space they need to conduct their research" says Matt Kolb, President of National Coatings Corporation.

"The new Center for Technical Innovation is a major step forward in our ongoing commitment towards providing the best roof coating technology and supporting the fight against climate change. The collaborative research undertaken here will generate breakthrough discoveries for the roof and coating industries" says Rick Sexauer, CEO of National Coatings Corporation.

National Coatings, known for their Performance through InnovationSM, will continue to strive forward and produce products that the roofing industry will continue to refer to as the industry's best.
